

Sisters High School Biomass Boiler Upgrade

OWNER: Sisters School District
PROJECT STATUS: Construction
LOCATION: Sisters High School
Sisters, Oregon

ENERGYneering worked directly with the Sisters School District to review all school utility costs to develop a no-cost renewable energy solution. The initial project is to install a wood pellet biomass boiler system funded through an Energy Savings Contract. Following a successful RFP process **ENERGYneering** has contracted to provide a turn-key design, build, and operate solution.

THE BIOMASS UPGRADE SOLUTION CONSISTED OF:

- Payback through an Energy Savings Contract
- Utility Costs Feasibility Study
- Biomass and Solar solutions Review
- Design, Installation, and Operation of a wood-pellet biomass boiler heating system

ENERGYneering provides customers the peace of mind that comes from experienced professionals skilled at completing turn-key renewable energy solutions.
